Discussion: Inspect Element & Debug CSS

Changes made with DevTools will go away on refresh

1. Inspect the box below and add your name to the blank!

Hello, My name is Kimi!

---

2. Edit the CSS and change the backround-color to cyan

Try using the color picker

Let's learn about inspect element and CSS

---

3. I am not accessible. I should have the correct style. Can you fix me?

I am accessible!

4. I wanted my font to be monospace, but for some reason I am not. Can you fix me?

```
I am a typewriter!
```

5. All elements are just boxes. Try changing some border, padding and margin using the box view in the Elements tab

I need some space!

6. Add a new CSS rule to make the links bold on hover

1. **Link 1**
2. Link 2
3. Link 3
